it was the great inventor Henry Ford who said, "Whether you think you can, or you think you can't, you're right." This quote has inspired Eric Mina to follow his dreams. It was this dream that led Eric to pursue a Bachelors in Psychology from Penn State University and certification as a hypnotherapist. Whether it's playing mind tricks in Australia, reading thoughts in Las Vegas, or performing comedy hypnosis in Times Square, Eric's understanding of the human mind astounds audiences worldwide. His show is a side-splitting, mind-boggling event that will leave you believing your dreams are possible. Eric's presence is all encompassing, and his powers are real.
